

We have over \$50,000 invested in gps equipment that relies on the same frequency. If this goes through who will be responsible for our losses? I thought it was the duty of the FCC to prevent interferences such as this from happening. Whose interests are being served? Oh and thanks a lot for letting legislation changes go through making use of our private band two way radio frequency illegal. We paid for use of that frequency. Where is our refund? That is going to cost us over \$2000 to replace those radios.
